

**St Clement's Catholic Primary School**  
**Protective Measures Risk Assessment 1<sup>st</sup> March 2021**

The new variant (of COVID) transmits more easily than the previous one but there is currently no evidence that it is more likely to cause severe disease or mortality. The way to control this virus is the same, whatever the variant. It will not spread if we avoid close contact with others. Wash your hands, wear a mask (when necessary), keep your distance from others, and reduce social contact in line with guidance. It remains vital that these measures, along with enhanced environmental cleaning and ventilation, are practised stringently.

<b>Name of School:</b>	<b><i>St Clement's catholic Primary School</i></b>	<b>Date of assessment:</b>	1 <sup>st</sup> March 2021	<b>Date of review:</b>	12 <sup>th</sup> March 2021 22 <sup>nd</sup> March 2021 1 <sup>st</sup> April 2021
Identify those at risk:	Staff Pupils Agency staff/contractors Visitors  Vulnerable groups: BAME Underlying health conditions including clinically extremely vulnerable (CEV) and extremely vulnerable	How someone could be harmed:	Coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus. The COVID-19 virus spreads primarily through droplets of saliva or discharge from the nose when an infected person coughs or sneezes.  Most infected people will develop mild to moderate illness and recover without hospitalisation. In some cases, and if a person has a underlying health conditions, COVID-19 can cause serious ill health.	Assessed by:	Lisa Kelly

Hazard identified:		The risk of spreading the coronavirus			
Current level of risk		Recommended controls/Mitigation and Protective Measures	In place? Yes/No	By whom?	Risk rating following action H/M/L
High	<b>Response to infection</b>  11. Managing confirmed COVID-19 cases	<ul style="list-style-type: none"> <li>• <a href="#">Flowchart school response to suspected or confirmed COVID-19 cases</a> to be followed for suspected or confirmed cases.</li> <li>• Schools should contact the DfE Helpline on 0800 046 8687 and select option 1 for advice on the action to take in response to a positive case. Schools will be put through to a team of advisers who will inform them of what action is needed based on the latest public health advice. If, following triage, further expert advice is required the adviser will escalate the school's call to the local health protection team. The health protection team will also contact schools directly if they become aware that someone who has tested positive for coronavirus (COVID-19) attended the school - as identified by NHS Test and Trace.</li> <li>• If someone has attended the site tests positive for COVID-19, the local health protection team will be contacted by the school.</li> <li>• The health protection team will provide guidance to support a rapid risk assessment to confirm who has been in close contact with the person during the period they were infectious and ensure they are asked to self-isolate. Based on the advice from the health protection team, schools must send home those people who have been in close contact with the person who has tested positive, advising them to self-isolate for 10 days since they were last in close contact with that person when they were infectious. Close contact means:</li> <li>• Direct close contacts - face to face contact with an infected individual for any length of time, within 1 metre, including being coughed on, a face to face conversation, or unprotected physical contact (skin-to-skin)</li> </ul>	Yes	HT DHT	Low

**Protective Measures Risk Assessment 1<sup>st</sup> March 2021**

Hazard identified:		The risk of spreading the coronavirus			
Current level of risk		Recommended controls/Mitigation and Protective Measures	In place? Yes/No	By whom?	Risk rating following action H/M/L
		<ul style="list-style-type: none"> <li>• Proximity contacts - extended close contact (within 1 to 2 metres for more than 15 minutes) with an infected individual</li> <li>• Travelling in a small vehicle, like a car, with an infected person</li> <li>• Household members of those contacts who are sent home do not need to self-isolate themselves unless the child, young person or staff member who is self-isolating subsequently develops symptoms. If someone in a class or group that has been asked to self-isolate develops symptoms themselves within their 10-day isolation period they should follow <u>guidance for households with possible or confirmed coronavirus (COVID-19) infection</u>. They should get a test, and:               <ul style="list-style-type: none"> <li>○ if someone who is self-isolating because they have been in close contact with someone who has tested positive for coronavirus (COVID-19)</li> </ul> </li> <li>• 19) starts to feel unwell and gets a test for coronavirus themselves, and the test delivers a negative result, they must remain in isolation for the remainder of the 10-day isolation period. This is because they could still develop coronavirus (COVID-19) within the remaining days.               <ul style="list-style-type: none"> <li>○ if the test result is positive, they should inform their setting immediately, and should isolate for 10 days from the onset of their symptoms. Their household should self-isolate for at least 10 days from when the symptomatic person first had symptoms, following <u>guidance for households with possible or confirmed coronavirus (COVID-19) infection</u></li> </ul> </li> <li>• Evidence should not be requested of negative test results or other medical</li> </ul>

		<p>evidence before admitting children or welcoming them back after a period of self-isolation.</p> <ul style="list-style-type: none"> <li>In most cases, schools and parents will agree that a child with symptoms should not attend school, given the potential risk to others. If a parent or guardian insists on a child attending school, schools can take the decision to refuse the child if in their reasonable judgement it is necessary to protect their pupils and staff from possible infection with coronavirus (COVID-19). Any such decision would need to be carefully considered in light of all the circumstances and the current public health advice.</li> </ul>

High	Workforce	<p><b>Clinically extremely vulnerable (CEV)</b></p> <p>Clinically extremely vulnerable people should not go to the workplace if they live or work in areas where shielding advice is active. Currently this applies to Tier 4 areas only. Otherwise, if you cannot work from home, you can still go to work in Tiers 1, 2 and 3. Under local restriction tier 3, staff and employers may wish to discuss flexibilities that support clinically extremely vulnerable staff, such as staggered start times to reduce travel during rush hour.</p> <p><b>Pregnant women</b></p> <p>Pregnant women are considered 'clinically vulnerable' or in some cases 'clinically extremely vulnerable' to coronavirus (COVID-19) and therefore require special consideration as set out in the guidance for pregnant employees. Employers should carry out a risk assessment to follow the Management of Health and Safety at Work Regulations 1999 (MHSW). Pregnant women of any gestation should not be required to continue working if this is not supported by the risk assessment. Women who are 28 weeks pregnant and beyond or are pregnant and have an underlying health condition that puts them at a greater risk of severe illness from COVID-19 at any gestation, should take a more precautionary approach. Employers should ensure pregnant women are able to adhere to any active national guidance on social distancing and/or advice for pregnant women considered to be clinically extremely vulnerable (this group may previously have been advised to shield).</p> <p><b>Clinically vulnerable</b></p> <p>Clinically vulnerable staff can continue to attend school. While in school they should follow the sector-specific measures in this document to minimise the risks of transmission This includes taking particular care to observe good hand and respiratory hygiene, minimising contact, and maintaining social distancing in line with the provisions set out in section 6 of the 'prevention' section of this guidance. This provides that ideally, adults should maintain 2 metre distance from others, and where this is not possible avoid close face to face contact and minimise time spent within 1 metre of others. While the risk of transmission between young children and adults is likely to be low, adults should continue to take care to socially distance from other adults including older children and adolescents. People who live with those who are clinically extremely vulnerable or clinically vulnerable can attend the workplace unless advised otherwise by an individual letter from the NHS or a specialist doctor</p>	Yes	HT	Low

Hazard identified:		The risk of spreading the coronavirus			
Current level of risk		Recommended controls/Mitigation and Protective Measures	In place? Yes/No	By whom?	Risk rating following action H/M/L
High	Aerosol generating procedures	<ul style="list-style-type: none"> <li>Staff performing AGPs in these settings should follow PHE's <u>personal protective equipment (PPE) guidance on aerosol generating procedures</u>, and wear the correct PPE, which is: a FFP2/3 respirator, gloves, a long-sleeved fluid repellent gown, eye protection</li> <li>Children and young people should be taken from the classroom or shared area for any AGP to be carried out in a designated room with the doors closed and any windows open. If this is not possible, for example in children and young people who require sporadic care, such as urgent tracheostomy tube suction, individual risk assessments should be carried out. In all instances, efforts should be made to:               <ul style="list-style-type: none"> <li>- ensure that only staff who are needed to undertake the procedure are present and that no other children or young people are in the room</li> <li>- minimise clutter to make the process of cleaning the room as straightforward as possible</li> <li>- clean all surfaces and ventilate the room following a procedure and before anyone not wearing appropriate PPE enters. Clearance of infectious particles after an AGP is dependent on the ventilation and air change within the room. For a room without ventilation, this may take an hour</li> </ul> </li> </ul>	Yes	HT	Low
